WEATHER OF CONCERN

Weather of Concern

- A Winter Storm in Northern California will produce rain and strong winds today.
 - A winter weather advisory is in effect for the Sierra Nevada Range from Kings Canyon north above 7,000 feet this afternoon into Monday. Eight to 15 inches of snow is possible with this system across the advised area.

Active Weather Warnings, Watches and Advisories by County:

- <https://alerts-v2.weather.gov/counties/CA>

WEATHER SYNOPSIS BY REGION

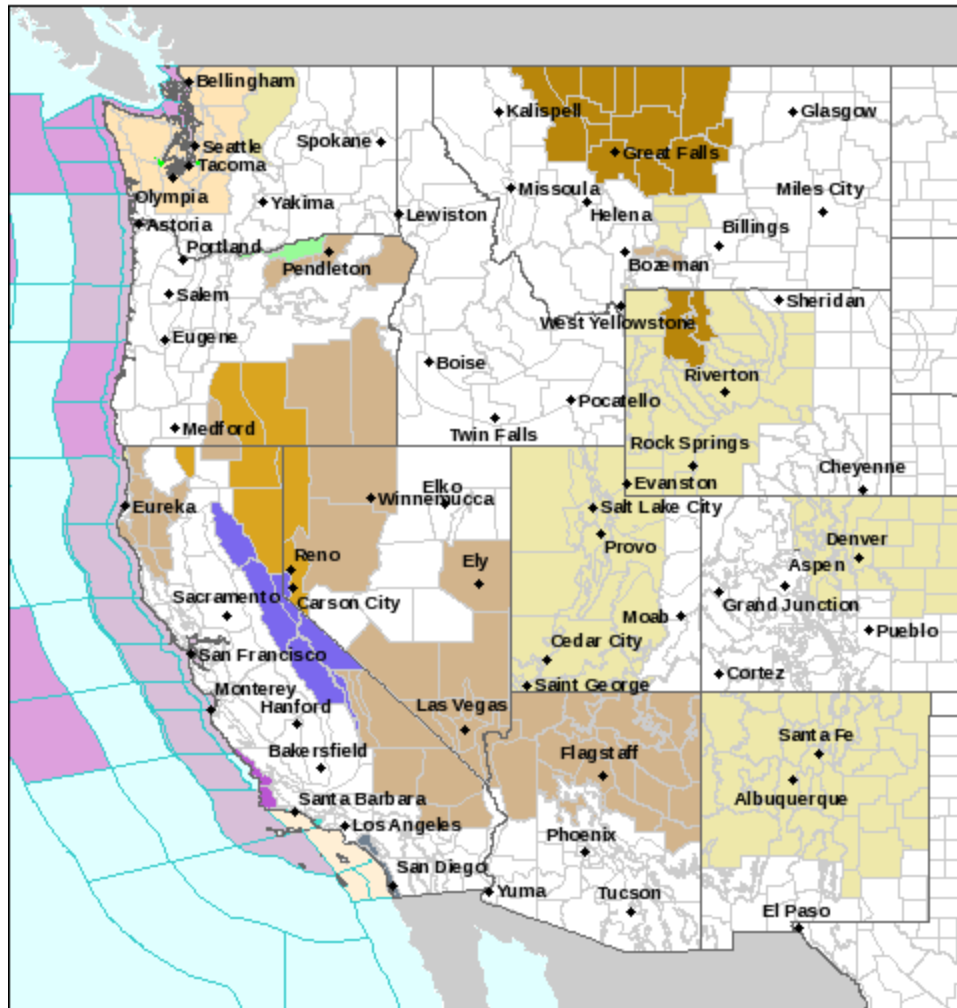

NORTHERN CALIFORNIA

Light to moderate rain is expected across the region today with locally heavy rain in for northwest counties. Snow levels will remain elevated this morning lowering to around 6500 feet in the Cascades and 5000 feet west of the Cascades late this afternoon, then lowering to 4000 to 5000 ft this evening into tonight. As snow levels lower another low pressure system is expected to track into southern portions of the region.

SOUTHERN CALIFORNIA

A Pacific trough will approach the West Coast Sunday and push inland Monday bringing significant cooling to the region. Temperatures will be below normal across the entire region by Monday. This trough will also bring scattered showers away from the deserts Sunday evening through Monday afternoon, with most locations expected to receive less than a quarter inch of rainfall. However, the Central Sierra and the Big Sur Coast will likely receive between 0.5 and 2 inches of rainfall. The snow level over the Sierra will be between 7,000 and 8,000 feet. There will be south to west winds of 20 to 30 mph with gusts to 50 mph across wind prone mountain, desert, and Central Coast locations Sunday afternoon through Monday afternoon.
